NAVAJO GENERATING STATION
NGS provides the power for the Central Arizona Project. The settlement resolves portions of litigation that could threaten the continued operation of NGS.
LAKE POWELL PIPELINE
Core System capable of diverting at least 6500 AFA of water from Lake Powell to Red Lake for distribution to Hopi and Navajo communities for municipal and industrial purposes.
Tuba City/Moenkopi Spur: Pipeline from Red Lake to Tuba City and Moenkopi to deliver 1000 AFA of M&I water.
Hopi Village Spur: Pipeline from Red Lake to Kykotsmovi with capacity to eventually deliver 3500 AFA of M&I water to Hopi villages.
Peabody Spur: If Peabody continues slurry line after 2005, it must use water from Lake Powell.
WESTERN PIPELINE
A pipeline will be constructed to provide 2,800 AFA of water from Lake Powell to water-short communities in western portion of the Navajo Nation.
SAN JUAN SOUTHERN PAIUTE TRIBE
The water rights of the SJS Paiute Tribe will be defined in the settlement agreement if the Tribe obtains a reservation by the effective date of the settlement.
N-AQUIFER AGREEMENT
The pumping of groundwater from the N-Aquifer is subject to specified limits.
NATIONAL PARK SERVICE
Separate stipulations will be executed between the National Park Service and many of the major water claimants to recognize and protect water uses within the following park service units: Walnut Canyon National Monument, Sunset Crater National Monument, Petrified Forest National Park, Wupatki National Monument, Hubbell Trading Post National Historic Site, Grand Canyon National Park.
SURFACE WATER AGREEMENT
The surface water in the five washes that traverse both reservations is allocated between the Navajo Nation & Hopi Tribe.
GROUNDWATER PROJECT
Groundwater will be developed for municipal and industrial purposes.
FLAGSTAFF AGREEMENTS
Special terms and conditions have been negotiated with Flagstaff, the largest municipality in the basin.
RAILROAD AGREEMENTS
Special terms and conditions will allow development of subsurface mineral estates owned by the railroads in the areas where groundwater development is restricted. The railroads seek to trade on-reservation mineral rights for mineral rights held by the United States out of the basin.
WINSLOW AGREEMENTS
Special terms and conditions with the city of Winslow concerning McHood operations and municipal uses of groundwater in zone B & C.
GROUNDWATER RESTRICTIONS
"Buffer Zones" south of the Navajo Reservation are designed to protect Navajo groundwater supplies. An additional zone in the 3 Canyon area protects surface water flows from groundwater pumping interference.
NAVAJO WATER MARKETING
Some of the state parties have insisted on a prohibition against out of basin water marketing by the Navajo Nation. The Navajo Nation will consider such prohibitions only if it receives an amount of CAP water which it can market and interbasin transfers of water by all parties are prohibited.
HOPI RANCHES
The Settlement Agreement will recognize the unique characteristics of the water rights associated with the lands aquired by the Hopi Tribe pursuant to P.L. 104-301.
ZUNI AGREEMENT
Restoration of riparian habitat at "Zuni Heaven" & rehabilitation of an irrigation project.
THREE CANYON PROJECT
Navajo Nation has rights to unappropriated surface water from Chevelon Creek, Clear Creek, & Jacks Canyon. The Nation will obtain a project to develop approximately 13,000 AFA of water for on-reservation municipal uses.
BLUE RIDGE RESERVOIR
Phelps Dodge to transfer facilities and water rights to Navajo Nation. Replacement water to be obtained through CRIC Settlement. Navajo to provide 3000 AFA to Payson, Pine, and Strawberry.
ENDANGERED SPECIES ISSUES
Section 7 consultation with the U.S. Fish & Wildlife Service to ensure that endangered species are not affected by releases from Blue Ridge Reservoir and the impoundment of water in Chevelon Canyon.
GRANDFATHERING AGREEMENTS
Existing non-Indian surface water rights are protected but future off-reservation surface water development is limited.
SHOW LOW LAKE
Phelps Dodge to transfer facilities and water rights to Navajo County. Replacement water to be obtained through CRIC settlement.
WHITE MOUNTAIN APACHE
As a result of a survey error when the Fort Apache Indian Reservation was established, the White Mountain Apache Tribe owns a small amount of Indian land in the LCR basin. This Tribe is not included as a party to this settlement. Water uses on Apache lands are not limited in any manner by this settlement.
